

4. If Player Two solves the IQ Square, they keep the card. If not, Player One reads the answer aloud and puts the card in a discard pile.
5. Player Two now takes the top card and turns it for the next player.
6. Play continues in a clockwise direction until all cards have been asked. The player with the most cards is the winner.

HOW TO PLAY:

1. Determine how many rounds or cards you are going to play.
2. Shuffle the deck and count off the number of cards required for everyone to get the same number of turns. Return the remaining cards to the box.
3. Player One takes the top card and carefully turns it over for Player Two to see, being sure to cover the answer at the bottom with a thumb or another card.
